

CANADIAN SATELLITE TRACKING AND ORBIT RESEARCH

**60 BUELL ST. SUITE #2
BROCKVILLE ONTARIO, CANADA K6V 4Y3**

CASTOR QUALIFICATIONS

CASTOR has thirteen years of satellite tracking experience based on its founder's extensive exposure to pioneering satellite tracking projects and research:

- CASTOR has provided consulting for several Canadian aerospace and satellite projects;
- CASTOR's founder, Michael A. Earl, was the first Requirements Manager for the Canadian Department of National Defence's Sapphire satellite;
- CASTOR's founder designed, constructed, tested and operated the first autonomous and remotely controlled optical satellite tracking facility in Canada;
- CASTOR's founder detected and provided tracking data for lost Russian Molniya satellites;
- CASTOR has extensive experience in writing professional technical papers and official proposals;
- CASTOR conducted the first independent optical survey of our orbiting satellites in which one fifth of the total known satellite population was detected and tracked (nearly 3,400 individual satellites); and
- CASTOR conceived, created and published several pioneering research papers in the subject of optical satellite tracking.
